

Solution: IZO™ Private Cloud

# Jeena & Company moves their ERP to the cloud for scalability and reliability

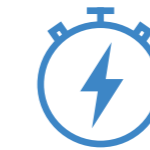

# Jeena & Company moves their ERP to the cloud for scalability and reliability

Offering a one-stop shop for import and export supply chain and logistics functions, Jeena & Company provides direct EDI access and online tracking including Indian customs. However, its in-house ERP solution was running on end-of-life legacy servers. That was causing frequent outages and could no longer support urgent system updates.

Now a Tata Communications IZO™ Private Cloud for applications compute and storage runs in a primary production data centre in Mumbai with a DR data centre in Bangalore. IZO™ Cloud Storage online back-up houses 6TB of data. As a managed solution, Tata Communications takes care of everything up to the OS level. An availability SLA of 99.9% is routinely achieved and exceeded. As well as improved availability and app response, and 10X back-up acceleration, the company is looking forward to a TCO reduction of up to 30 percent.

Solution: IZO™ Private Cloud

**Superfast app responses** delight users

**10X accelerated** back up

**99.9% availability** SLA exceeded

**30% drop** in TCO anticipated

“As our global growth continues, the Tata Communications cloud solution gives us the scalability and reliability we need to speed the journey.”

**Meheriar Patel**
